HOW THE HALF-HOLIDAY IS OBSERVED. There was comparatively little attention paid to the Saturday Half-Holiday law by the retail merchants of this city and Brooklyn yesterday. A few of the large stores, such as Arnold, Constable & Co's and Altman s, who have pleneered the movement from the beginning, still close at noon on Saturday and will probably continue to do so until next month, but the great majority keep open until 6 o'clock, as formerly. Carrful observers, however, say that the volume of trade done on the last attenoon of the week in the shopping district is not as great as it used to be, business being distributed through the week more in consequence of the general adoption of the half-holiday through the summer.

In she whole-sale districts there is still a wide observance of the new rotorm, and this is also true among professional men lawyers, and so on, as well as in regard to any number of commission houses and large establishments. This fact gives great satisfaction to the members of the Half-Holiday Association, who insist that once having experienced the benefits of a half-holiday each week the people will never consent to give it up entirely, though it may take some time to get the reform established universally. of this city and Brooklyn yesterday.
